

MOTIONCUT – TASK 1

Airtel BroadBand price Decsription Details:

1. I have created a AirtelBroadBand cloud using HTML , CSS and JavaScript .
2. I have made the website responsive which will make the website adjust automatically according to the screen the user is using.
3. I have made the website interactive by adding some JavaScript elements.
4. I have used the CSS properties to make the website colorful.
5. Firstly for the user I have divided the whole pricing details into two parts based on the duration of the plan they are opting for.
6. The two categories are Monthly based and Six Months based categories.
7. I have further divided these categories into three types based on the price , requirements and features .
8. The sub divided parts are : Basic , Premium and VIP packages.
9. Basic Plan:
 - In the Basic plan for 1 Month we are offering unlimited data service with a speed of 40 MBps. If they are new user , they have to pay the installation fees.
 - In the basic plan for 6 Months we are offering unlimited data service with a speed of 40 Mbps . If they are new user we are providing free installation for them.
10. Premium Plan:
 - For the 1 Month we are provided unlimited data along with the Television services. However if they are new user they have to pay installation fees.
 - For the 6 months it is same as 1 month expect that the installation fee is not there.
11. VIP Plan:
 - For the 1 Month users we are providing unlimited data , Television services along with subscription of 5+ OTT platforms. New user have to pay installation charges.
 - For the 1 Month users we are providing unlimited data , Television services along with subscription of 5+ OTT platforms. Installation is free for new users
